Terms for this app: Brave Browser for PC Windows 10 • Brave PC Browser Windows 10 • Brave Browser Download Windows 10 • Windows 10 • Brave Browser for Windows 10 Save it's amazing how quickly pages load when you remove all but real content. A whopping 60% of page load time is caused by basic ad technology that loads into different places every time you hit a page on your favorite news site. And 20% of this is the time it takes to load what you're doing to learn more about you. For example, allow news page data and load time tracking and allow general advertising. Find bravery safer with bravery on your side, our goal is to block everything on the web that can cramp your style and compromise your privacy. annoying ads yesterday's Cookies remain in the jar to which they belong. Brave Block Harmful Ads: There is a new advertising game in town. It is called the horse. The latest display advertising technology allows you to install malware on your laptop without your knowledge. But brave looking behind you. Redirect your site to Brave HTTPS: We've integrated HTTPS everywhere into every brave browser to make sure you always move bits across the safest pipes. Brave block tracking pixels and tracking cookies: Can you get the feeling that someone is watching you when you see an ad for something you bought a few days ago? Shop online and make sure it's not tracked while browsing your favorite sites. Brave is open source with us on GitHub and contributes to the brave as we build the web of the future. We believe in having an open source community. It's our web and we want to work it out as a team, so everything from our back end to the front end is open. We're progressing fast, so we look forward to seeing new commits in a unit of time. What's new: The Android version has been updated to 1.5.131. We got the following improvements: we made some Polish improvements and we fixed the reward auto contribution fixed and fixed some other small bugs we made some small changes to the home button functional closed home button functional do not close the browser now, unless you decide in settings and we have a few other small fixes that are more stable than the new beast Google Chrome in the browser's environment with the goal of making the brave browser faster. The idea behind this performance is to improve your search speed by taking banners, trackers, pop-ups and other forms of advertising from websites you've visited. The browser was created by Brendan Eich, one of the contributors to the Mozilla project, and is also the creator of JavaScript. So you know that this browser is being designed by the best in the world. The browser has two features that jump out: the first is the security and safety of the search, and the second is its unique, reward system that keeps coming back. Users know the total stored time because the browser will track their leisure time while browsing. Another advantage of Brave is that it reduces the risk of adware and malware infections. In addition, it protects users from identity theft, ransomware infections that encrypt data and ask for money to regain access to it, and so on. Complete safety and security Safety and security are becoming increasingly important when browsing online. And one potential risk to your safety is the bunch of ads that keep spamming your screen when you enter your site in a regular browser. It now has a built-in ad blocking software that keeps you safe from the most harmful malware on the Internet. It loosely depends on Chrome, but the browser manages to keep it on bare bones and stuff you need when browsing. You can also access Tor through this browser. Safe online. The Unique Reward SystemBrave browser removes common ads from websites and adds screening ads that are displayed in the form of pop-ups. And the more you interact with these pop-ups, the more basic caution tokens you get, which are brave cryptocurrencies. It also has a built-in encrypted wallet that you can use for your convenience. You can see detailed video reviews of this cool browser: Brave Browser is an advanced and modern browser with a secure and secure browsing and unique reward system. It is definitely worth a try. Effort.
